

SMITH SOFTWARE SOLUTIONS LLC (S3)

Capabilities Statement

Business Information

Website: www.smithsoftsolutions.com
Email: business@smithsoftsolutions.com
Phone: 6067272042
Location: Pikeville, Kentucky, United States
Status: Small Business LLC
UEI: L54LW9K4L361
CAGE: 221X0

Core Capabilities

S3 is a software and digital product development company specializing in end-to-end design, engineering, and delivery of modern web and mobile applications. We support product development initiatives and engineering teams with scalable system design, full-stack development, and API-driven architecture.

Core Service Areas

S3 supports government agencies, prime contractors, and commercial organizations requiring custom software development, digital modernization, workflow automation, and systems integration services.

- **Product Architecture** (system design, scalability planning, technical specification)
- **Full-Stack Web Development** (React, Next.js, TypeScript, Node.js, SQL)
- **Mobile Application Development** (iOS, Android, cross-platform)
- **API & Platform Engineering** (REST, microservices, database design & management)
- **Digital Product Strategy** (roadmapping, discovery, go-to-market planning)
- **UX & Interface Design** (wireframing, prototyping, usability design)

Relevant Experience

Transportation Logistics Management Platform

- Contributed to the development of a full-stack logistics management platform supporting order processing, dispatch coordination, route management, delivery verification, and operational reporting across web and mobile environments.
- Collaborated with stakeholders to implement business workflows, database-driven processes, and real-time operational visibility tools supporting day-to-day logistics operations.
- Significantly improved tracking, response time, auditing, and user experience across entire transportation teams.

IT Management | Oil & Gas Environment

- Managed Microsoft 365 tenant administration and user lifecycle management
- Performed hardware/software troubleshooting across laptops, tablets, and mobile devices
- Improved internal IT response workflows and reduced downtime across departments

Technical Competencies

- | | | | |
|----------------------|--------------|--------------|----------|
| • React/React Native | • NextJS | • TypeScript | • HTML |
| • Node | • PostgreSQL | • REST APIs | • CSS |
| • Azure | • Git | • GitHub | • Docker |

Differentiators

- Direct engagement with technical leadership throughout project execution
- Practical enterprise IT experience supporting operational environments in the oil and gas sector
- Agile and iterative delivery methodology
- Rapid onboarding capability for subcontract roles and task orders
- Full-stack expertise across frontend, backend, databases, and cloud infrastructure
- Experience supporting enterprise business systems and end-user environments
- Flexible engagement models including fixed-price, time-and-materials, and ongoing support
- Cost-effective delivery without large-prime contractor overhead
- Focus on maintainable, scalable, and secure solutions

NAICS Codes

- **541511** Custom Computer Programming Services.
- **541512** Computer Systems Design Services.
- **541519** Other Computer Related Services.
- **518210** Data Processing, Hosting, and Related Services.
